DRAIN ACCUMULATED WATER FROM PITOT STATIC SYSTEM

_____ XXXXX 1. Drain accumulated water from pitot static system as follows:

A. Locate pitot static moisture indicators in Avionics
Compartment. Moisture indicators are on the left and right
side of main avionics rack.

B. If moisture is seen in a line, remove drain cap and drain
moisture.

Note: If moisture is found, check pitot heads (probes)
drains for blockage per AMM 34-11-02 page 204.

C. Replace cap.

D. Leak check must be done on any system which was drained.

E. Make sure area is clean and tools removed.
